

ANTI-AIRLOCK ADAPTOR

The anti-air-lock adapter is simple to install and helps prevent air locks from being created.

This adapter is typically applied in combination with the MAGY but can also be connected to other level sensed condensate drains.

The anti-air-lock adapter has a 1/2" inlet and outlet.

Features

Installation of the anti-air lock adapter with a MAGY, under a filter.

- Ensuring the installation is carried out correctly, the anti-air lock adapter allows the trapped air to escape back in to the system.

Specifications

Housing material	Brass
Inlet/outlet connections	1/2" BSP or NPT
Media temperature	1 - 55 °C
Ambient temperature	1 - 55 °C
